Work Experience

Computer Programmer II

February 2023 - Present

Maritime Industry Authority (MARINA)

Port Area, Manila City

- Developed an inventory management system for the General Service Division enhancing and modernizing the old paper-based document record system by implementing a more efficient, precise and reliable for all necessary transactions within the organization.
- Created a ticketing system for the Information and Communication Technology Management Division that aimed to revamping and resolving existing issues concerning IT-related assistance of MARINA employees.
- Recreated, redesigned and restructured the Overseas Shipping Service Information Management System to be able to fully utilized by the office of Overseas Shipping Service of MARINA. This overhaul enhanced the efficiency of processes related to company and vessel registration, certification, document approval and document release.
- Developed a mobile-responsive assets maintenance tracker system for the Information and Communication Technology Management Division that manages records of maintenance for IT-related technologies such as computers, laptops, printers and more.
- Created an online web-based document request system for the Human Resources Management and Development Division that facilitates the document requests not only for the division but also efficiently serve the employees of MARINA.
- Developed an online public assistance desk system for the Standards of Training, Certification and Watchkeeping for Seafarers Office that centralized the concerns and inquiries of the seafarers.
- Maintained the Human Resources Information Management System for the Human Resources Management and Development Division of MARINA which involves identifying and resolving any existing bugs or technical issues within the system to ensure the continuous operation of Human Resources Management and Development Division.

Full Stack Developer

February 2022 - April 2023

Avinnovz Technologies Inc.

Katipunan, Quezon City

- Lead in both frontend and backend development of the Case Management System for the Department of Environment and Natural Resources (DENR) Main Office. My primarily contributions are implementing the UI/UX designs, developing the content management module of the cases and revamping the procedures for case appointments.
- Contributed to the backend development of the Timekeeping Management System for the Senate of the Philippines. Designed and implemented APIs to integrate the data captured from the organization's facial recognition machines into the system.
- Helped in the recreation of the Real Property Tax Administration and Collection System for the Municipal of San Mateo, Rizal. Focused on the development of the collection section, particularly on tax computations, streamlining payment processes, printing of receipts and producing required reports.
